

The Black Stone

Everyone was convulsed by the Planes Operation on 9/11. No one heard about the Black Stone Plot. It was to take place on the same day — September 11, 2001. It failed the first time. The key co-conspirator escaped the collapse of the Twin Towers. He's ready to try again. The time could be a year away — or one second from now. The clock is ticking ... This is no ordinary plot. It's bigger than 9/11 and more devastating. The Black Stone Plot has been two thousand years in the making.

Cleverly manages to weave threads of myth, legend, history and religion in the Vergilian manner...
